

Activity 3-1: Configuring Settings

1. Viewed the About configuration and Apps & Features

About

Your PC is monitored and protected.

[See details in Windows Security](#)

Device specifications

Device name	MOS-WIN10-HSK
Processor	12th Gen Intel(R) Core(TM) i5-1240P 2.11 GHz (2 processors)
Installed RAM	4.00 GB
Device ID	5B9BC372-0D65-4DAD-A29B-CFC8A26E6246
Product ID	00329-20000-00001-AA705
System type	64-bit operating system, x64-based processor
Pen and touch	Touch support with 8 touch points

Apps & features

Choose where to get apps

Installing apps only from Microsoft Store helps protect your device.

Anywhere

Apps & features

[Optional features](#)

[App execution aliases](#)

Search, sort, and filter by drive. If you would like to uninstall or move an app, select it from the list.

Search this list

Sort by: Name Filter by: All drives

42 apps found

	3D Viewer Microsoft Corporation	16.0 KB 9/12/2023
	App Installer Microsoft Corporation	16.0 KB 9/12/2023
	Calculator Microsoft Corporation	16.0 KB 9/12/2023
	Camera Microsoft Corporation	16.0 KB 9/12/2023

2. Reviewed Multitasking and Tablet Mode settings

Multitasking

Work with multiple windows

Drag windows to the sides or corners of your screen and they'll automatically size to fit perfectly, side by side.

Snap windows

On

- ☒ When I snap a window, automatically size it to fill available space
- ☒ When I snap a window, show what I can snap next to it
- ☒ When I resize a snapped window, simultaneously resize any adjacent snapped window

Timeline

Show suggestions in your timeline

On

Alt + Tab

Pressing Alt + Tab shows

Open windows and 5 most recent tabs in Edge

Virtual desktops

On the taskbar, show windows that are open on

Only the desktop I'm using

Pressing Alt+Tab shows windows that are open on

Only the desktop I'm using

Tablet

When I sign in

Use the appropriate mode for my hardware

When I use this device as a tablet

Don't switch to tablet mode

[Change additional tablet settings](#)

3. Changed the Hide App Setting to Off

Change additional tablet settings

Tablet mode

When I'm using tablet mode

Hide app icons on the taskbar

4. Reviewed the storage use on this pc (virtual machine)

Local Disk (C:) - 48.1 GB

This is how your storage is used and how you can free up space.

	System & reserved	18.5 GB
System files help Windows run properly		
	Apps & features	3.77 GB
Uninstall unused or undesired apps & features		
	Temporary files	242 MB
Choose which temporary files to remove		
	Other	3.01 MB
Manage other large folders		
	Documents	0 bytes
Manage the Documents folder		
	Pictures	0 bytes
Manage the Pictures folder		
	Music	0 bytes
Manage the Music folder		
	Videos	0 bytes
Manage the Videos folder		

5. Viewed Control Panel/System Settings

Activity 3-2: Configuring Autoplay

1. Changed removable drive and memory settings.

AutoPlay

Use AutoPlay for all media and devices

Choose AutoPlay defaults

Removable drive

Open folder to view files (File Explorer) ▼

Memory card

Open folder to view files (File Explorer) ▼

2. Reviewed the settings in Control Panel/Autoplay.

[Choose what happens when you insert each type of media or device](#)

☒ Use AutoPlay for all media and devices

Removable drives

Removable drive

Open folder to view files (File Explorer) ▼

☐ Choose what to do with each type of media

Pictures

Choose a default ▼

Videos

Choose a default ▼

Music

Choose a default ▼

Mixed content

Choose a default ▼

Camera storage

Memory card

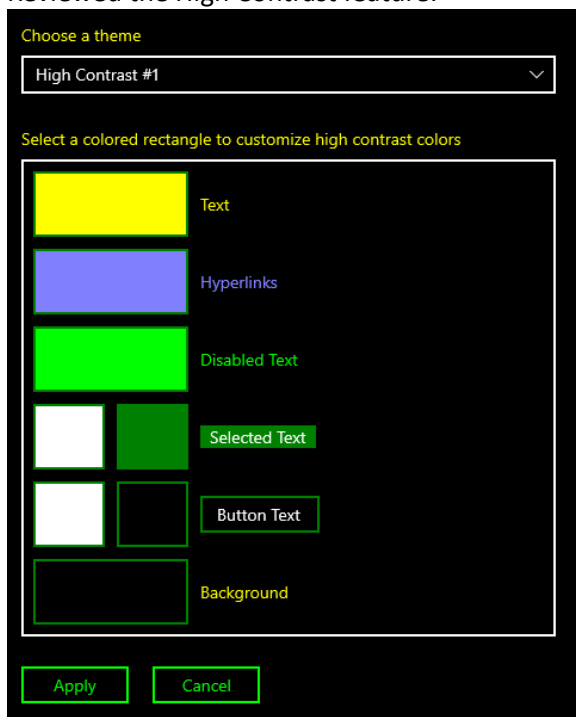

Open folder to view files (File Explorer) ▼

Activity 3-3: Using Ease of Access Features

1. Tested the Magnifier and Invert Colors features.

2. Reviewed the High Contrast feature.

3. Checked-out the on-screen keyboard feature.

Activity 3-4: Configuring Privacy Setting

1. Reviewed the Privacy Settings and the Location Settings.

General

Change privacy options

Let apps use advertising ID to make ads more interesting to you based on your app activity (Turning this off will reset your ID.)

☐ Off

Let websites provide locally relevant content by accessing my language list

☒ On

Let Windows track app launches to improve Start and search results

☒ On

Show me suggested content in the Settings app

☒ On

Location

Allow access to location on this device

If you allow access, you will enable Windows to use your device's capabilities to determine your location and Microsoft will use your location data to improve location services. People using this device will be able to choose if their apps have access to location by using the settings on this page. Denying access blocks Windows from providing location to Windows features, Microsoft Store apps, and most desktop apps.

Location for this device is off

[Change](#)

Allow apps to access your location

If you allow access, you can use the settings on this page to choose which apps can access your device's precise location and location history to enable location-based experiences such as directions and weather. If you are signed in with a Microsoft account on this device, your last known location is saved to the cloud, and shared with other devices where you are signed in with your Microsoft account. Denying access only blocks the apps listed on this page from accessing your location.

☐ Off

Some desktop apps may still be able to determine your location when settings on this page are off. [Find out why](#)

- Configured Camera and Microphone privacy settings. Messaging was not among the applications listed.

Choose which Microsoft Store apps can access your camera

Turning off an app prevents it from directly accessing your camera. It does not prevent the app from accessing the camera indirectly through the Windows' Camera app. To prevent apps from also accessing the camera indirectly using the Windows' Camera app, you must also turn off access to the Camera app in the following list.

	3D Viewer	☐ Off
	Camera	☐ Off
	Desktop App Web Viewer	☐ Off
	Feedback Hub	☐ Off
	Microsoft Photos	☐ Off
	Microsoft Store	☐ Off
	OneNote for Windows 10	☐ Off
	Skype	☒ On
	Xbox Game Bar	☐ Off

Choose which Microsoft Store apps can access your microphone

Some apps need to access your microphone to work as intended. Turning off an app here might limit what it can do.

Sort by: **Name** ▾

	3D Viewer	☐ Off
	Camera	☐ Off
	Desktop App Web Viewer	☐ Off
	Feedback Hub	☐ Off
	Get Help	☐ Off
	Microsoft Photos	☐ Off
	Microsoft Store	☐ Off
	Mixed Reality Portal	☐ Off
	OneNote for Windows 10	☐ Off
	Skype	☒ On
	Take a Test	☐ Off
	Voice Recorder	☒ On
	Xbox Game Bar	☐ Off

- Reviewed the Privacy Statement in the Feedback and Diagnostic section.

Microsoft Privacy Statement

Last Updated: August 2023 [What's new?](#)

Your privacy is important to us. This privacy statement explains the personal data Microsoft processes, how Microsoft processes it, and for what purposes.

Microsoft offers a wide range of products, including server products used to help operate enterprises worldwide, devices you use in your home, software that students use at school, and services developers use to create and host what's next. References to Microsoft products in this statement include Microsoft services, websites, apps, software, servers, and devices.

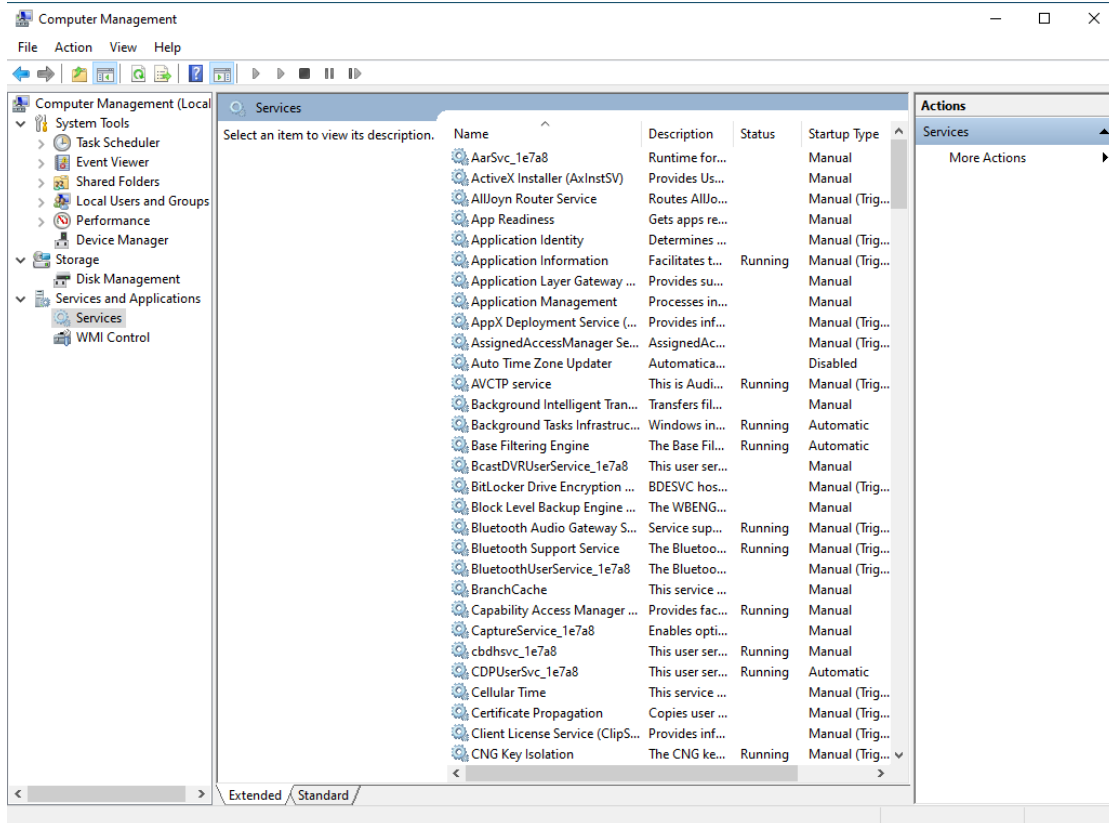

Please read the product-specific details in this privacy statement, which provide additional relevant information. This statement applies to the interactions Microsoft has with you and the Microsoft products listed below, as well as other Microsoft products that display this statement.

Young people may prefer starting with the [Privacy for young people](#) page. That page highlights information that may be helpful for young people.

For individuals in the United States, please refer to our [U.S. State Data Privacy Notice](#) and the Washington State [Consumer Health Data Privacy Policy](#) for additional information about the processing of your personal data, and your rights under applicable U.S. State data privacy laws.

Activity 3-5: Using Computer Management

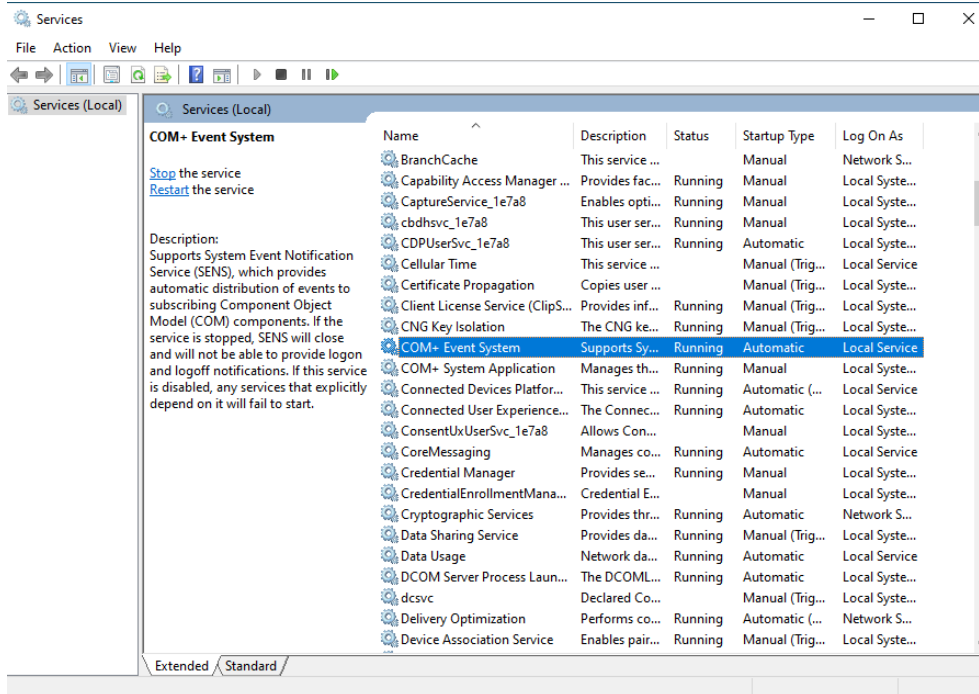

1. Viewed the Services listing in the Computer Management application.

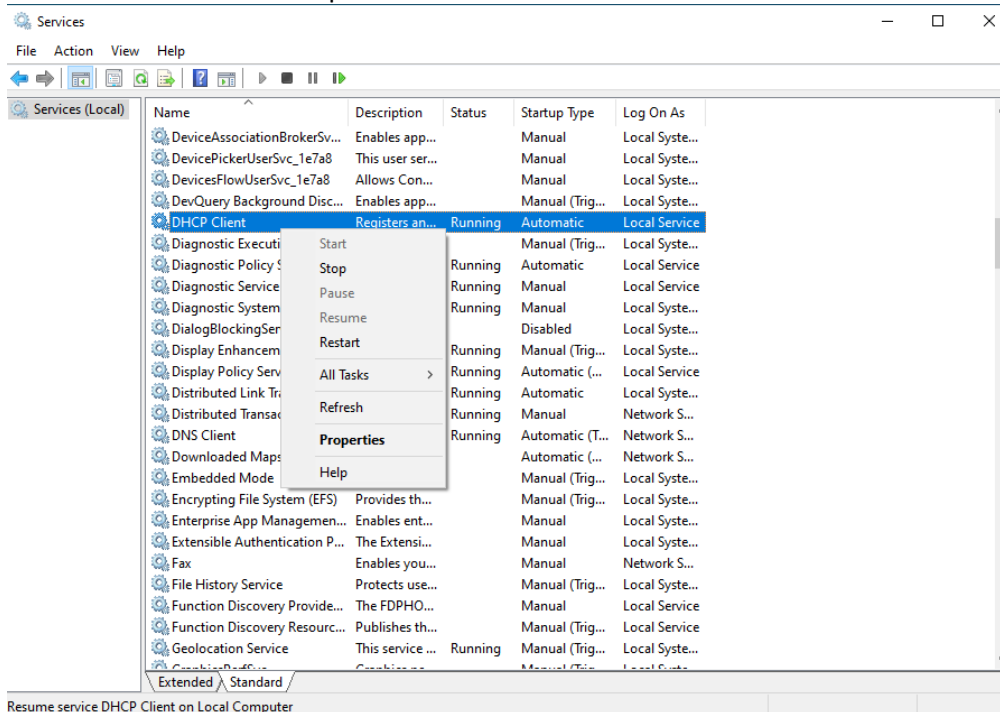

2. Saw that I could directly access the same app by right-clicking on the Start button, and clicking on the Computer Management icon.

Activity 3-6: Managing Services

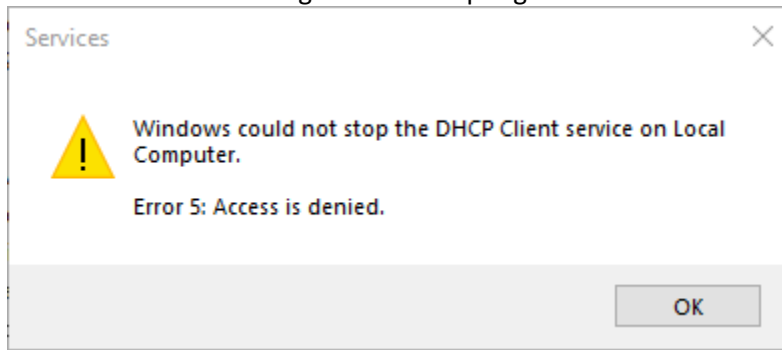

1. Viewed the Extended view for Computer Browser- Computer Browser is not available, so I put extended view of COM-Event System.

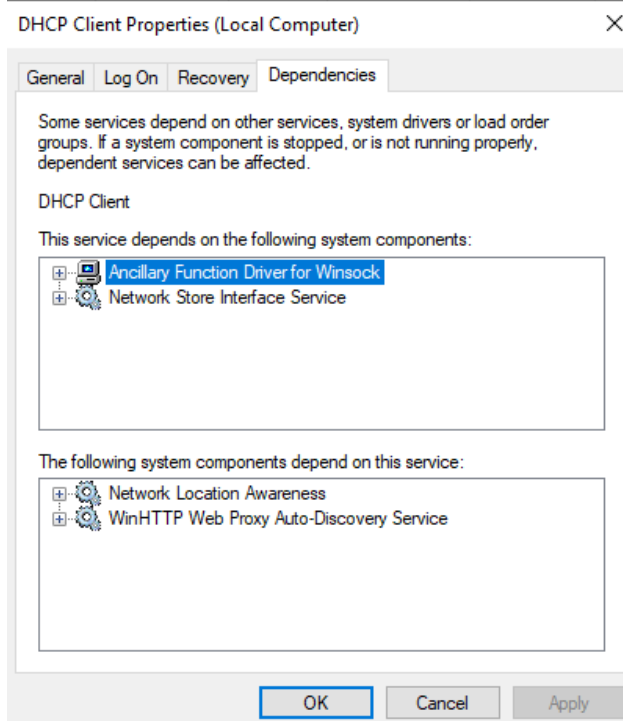

2. Tested the service restart option on the DHCP Client.

3. Received an error message after attempting the restart. Clicked on the Ok button.

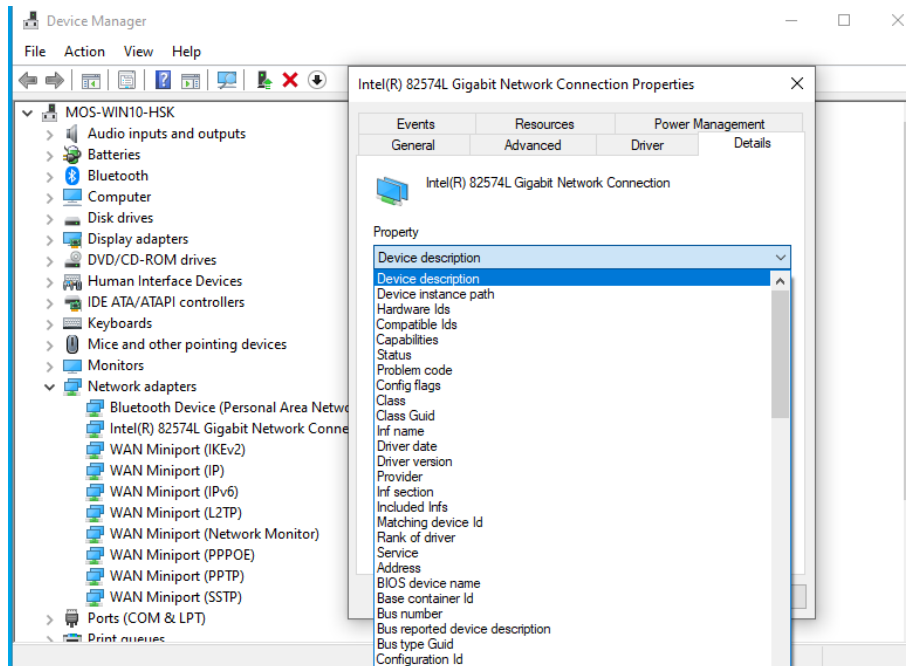

4. Looked at the Log On, Recovery, and Dependencies tab of the DHCP Client service.

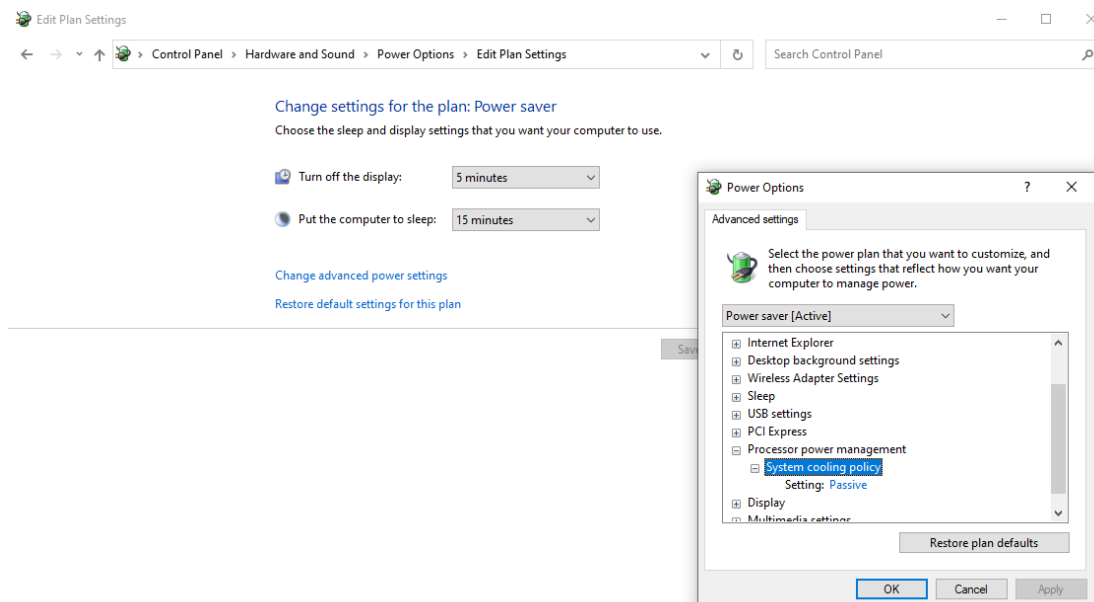

Activity 3-7: Using Device Manager

1. Opened the Device Manager, navigated around in it, and viewed tabs containing settings and details associated with my network card driver.

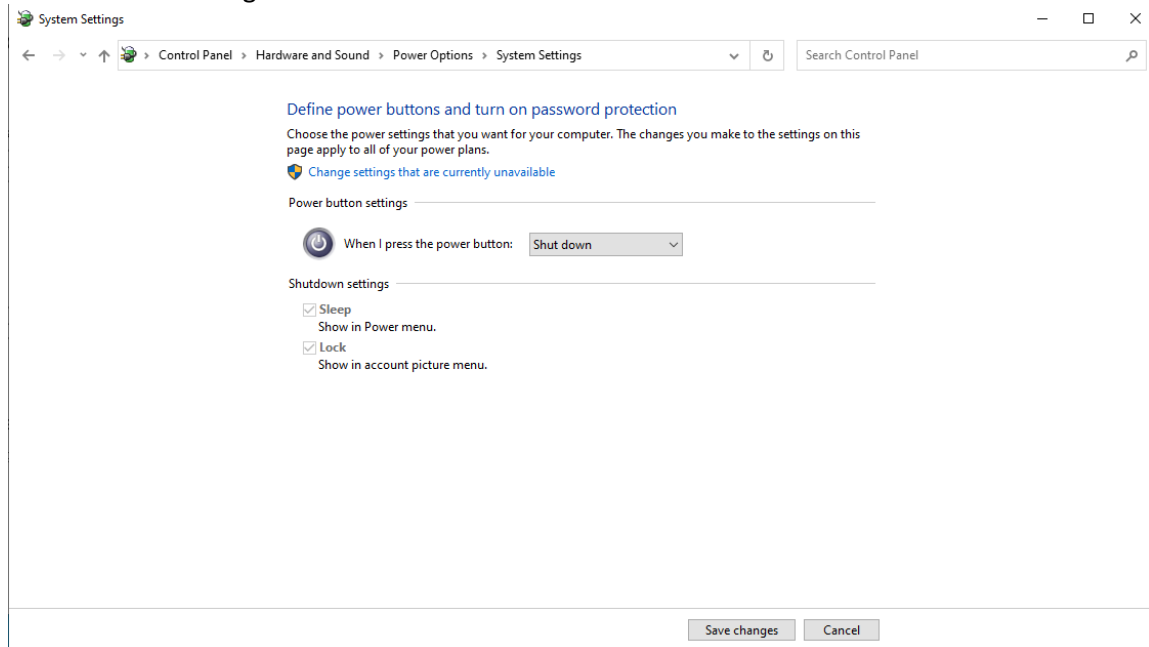

Activity 3-8: Configuring a Power Plan

1. Reviewed the Advanced Power Plan Settings. Not all the settings described in the text were available.

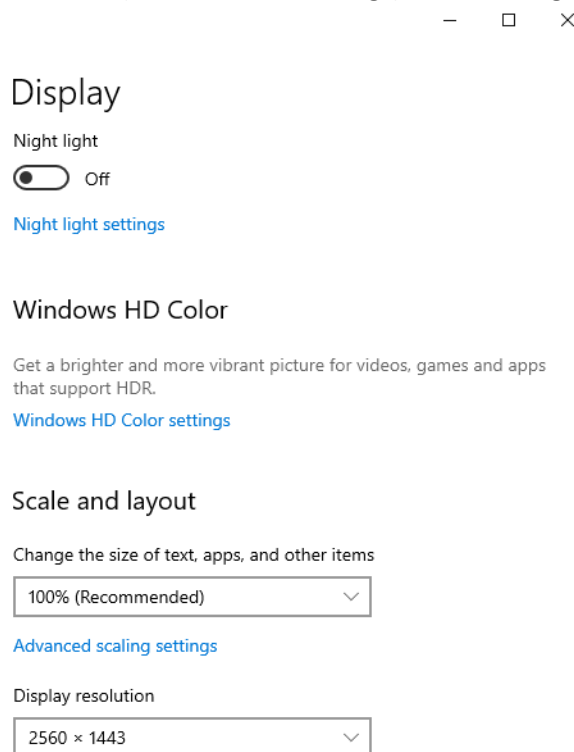

2. Reviewed the settings for the Power button.

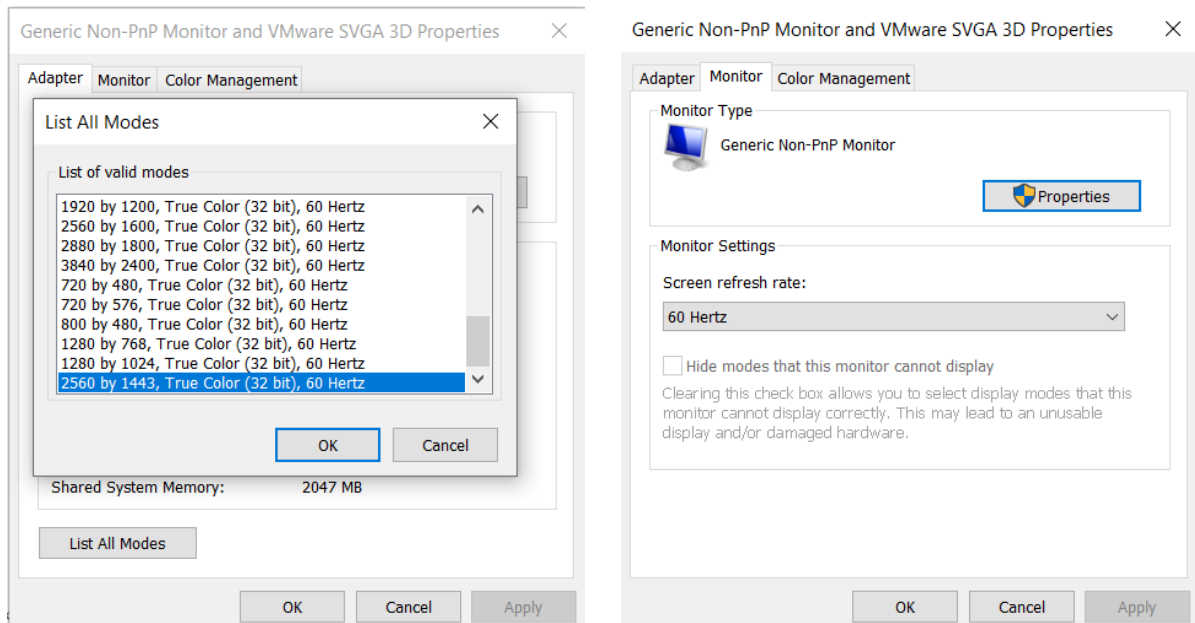

Activity 3-9: Configure Display Settings

1. Reviewed the Display Settings. Due to the virtualized environment, some settings were locked, and others (the Advanced Settings) were missing.

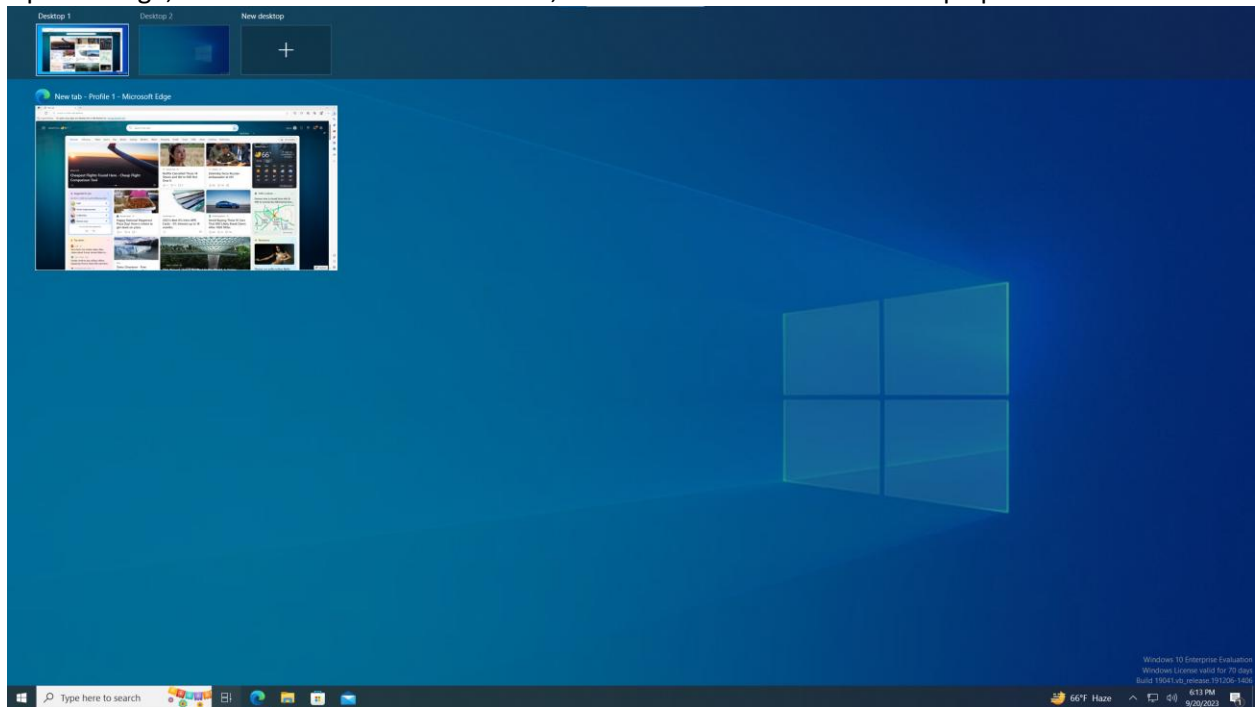

2. Reviewed the Modes and Monitor settings available for this monitor.

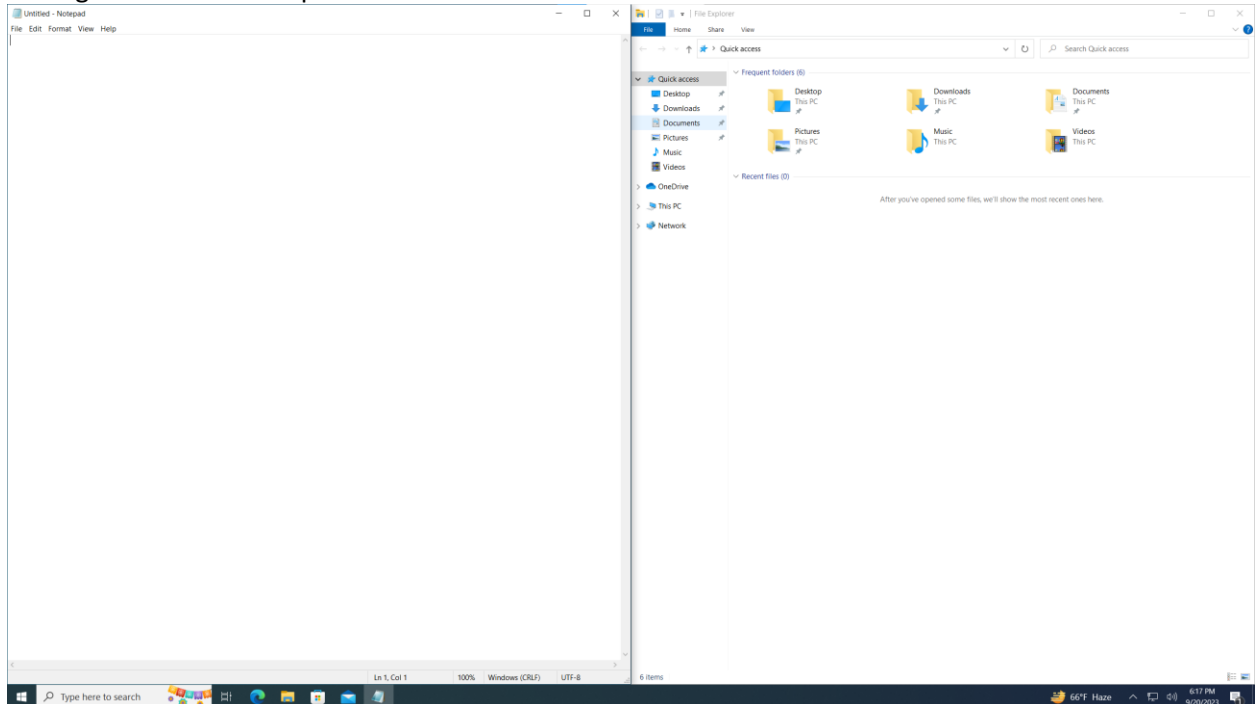

Activity 3-10: Using Multiple Desktops

1. Opened Edge, clicked Task View in the taskbar, and clicked on the +New desktop option.

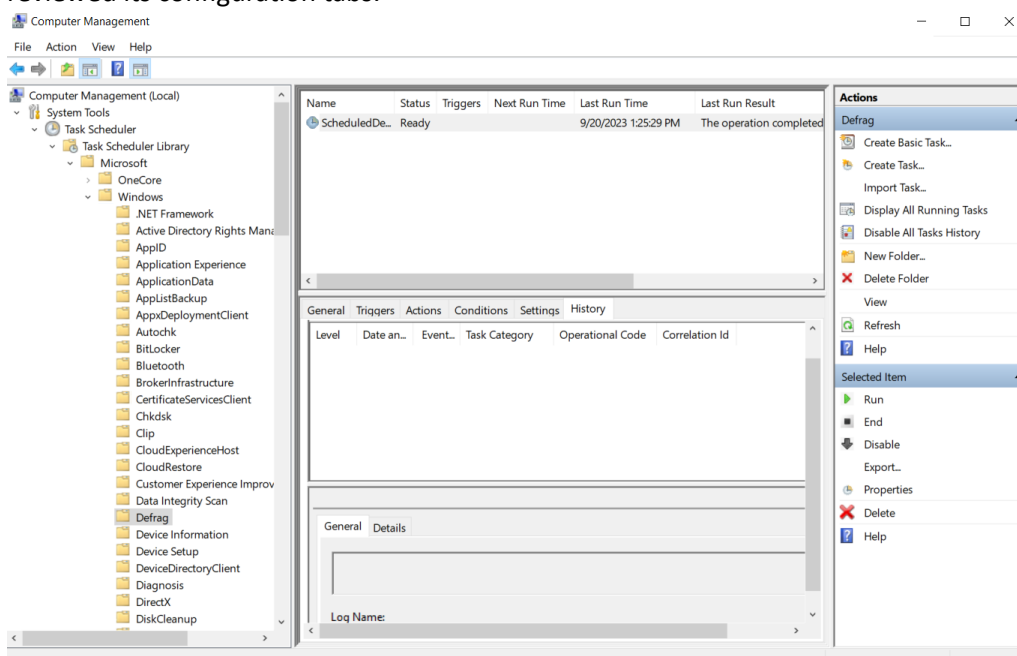

2. Opened File Explorer and Notepad, and used the windows-key+arrows to snap them to the left and right sides of Desktop 2.

3. Observed that closing desktop 2 did not close the applications on it but moved them to Desktop

Activity 3-11: Using Task Scheduler

1. Viewed the Task Scheduler feature in Computer Management. Examined the Defrag item, and reviewed its configuration tabs.

Activity 3-12: Using Windows Powershell

1. Practiced working with the PowerShell command environment.

```
PS C:\Users\User1> Get-Service -Name w32time

Status      Name      DisplayName
-----
Stopped     w32time    Windows Time

PS C:\Users\User1> Get-Service -Name w32time | Format -List
Invalid drive specification.
PS C:\Users\User1> Get-Service -Name w32time | Format-List

Name                : w32time

```

2. Examined Out-Grid View feature.

The screenshot shows a Windows PowerShell window with the command `Get-Process | Out-GridView` executed. The output is a table of running processes, with columns for Handles, NPM(K), PM(K), WS(K), CPU(s), Id, SI, and ProcessName. The table is sorted by CPU usage, with ApplicationFrameHost at the top.

Handles	NPM(K)	PM(K)	WS(K)	CPU(s)	Id	SI	ProcessName
329	20	7792	26996	0.61	4,016	1	ApplicationFrameHost
170	11	6604	12216	2.19	4,124	0	audiodg
269	14	4424	17084	4.03	2,312	1	conhost
509	21	1740	4756		440	0	csrss
464	23	5236	29568		540	1	csrss
466	17	4392	20888	3.17	636	1	ctfmon
225	13	2868	14580	2.42	2,068	1	dllhost
286	14	3828	11348		4,488	0	dllhost
245	16	3376	12388	0.56	5,084	1	dllhost
1,062	51	103412	71032		528	1	dwm
2,279	87	92476	146716	60.81	4,944	1	explorer
183	14	3572	17056	0.09	744	1	FileCoAuth
